³ adjusted net income = net income using replacement cost (Group share) adjusted for special items and excluding Total's share of adjustments and, from 2009, selected items related to Sanofi-Aventis. Total's net income (Group share) for the 2nd quarter 2009 was 2,169 M€

The Board of Directors of Total, led by Chairman Thierry Desmarest, met on July 30, 2009 to review the Group's second quarter and first half 2009.

Adjusted net income was 1,721 million euros (M€), a decrease of 54% compared to the second quarter 2008 and 19% compared to first quarter 2009.

The Board of Directors approved the 2009 interim dividend of 1.14 €/share for payment in November⁴.

Commenting on the results, CEO Christophe de Margerie said :

«In the second quarter, the price of Brent rose by 33% compared to the first quarter, lifted by the anticipation of an economic recovery and by OPEC maintaining its production discipline. However, weak demand caused natural gas prices and refining margins to fall sharply. The environment for chemicals stabilized after recent quarters that were affected by low demand. The dollar averaged 1.36 \$/€ in the quarter.

Total's adjusted net income of 2.35 billion dollars and gearing close to 25% confirms that we are able to resist in a weaker environment. Since the start of the year, Total has issued close to 5 billion euros of debt with competitive terms to maintain its financial flexibility.

While maintaining a sustained level of investment to prepare for the future, Total is fully engaged in ongoing cost reduction and optimization programs needed to lower the breakeven points and launch new development projects. For example, after succeeding in significantly reducing costs, the Group made its final investment decision on the Jubail refinery project with Saudi Aramco and awarded construction contracts.

Since the beginning of the year, the Akpo, Tahiti and Tyrihans fields have started up as planned. Despite these successes, the Group's hydrocarbon production declined relative to the first quarter of this year because of high maintenance, impact of higher prices on entitlement production and weak gas demand with only a partial offset from the contribution from new fields.

Over the remaining months of the year, we expect to benefit from the ramp-up of these new fields and the start-up of Yemen LNG, Qatargas II train B and Tombua Landana in Angola. Exploration success during the quarter, acquisition of new permits and the partnerships with Cobalt in the Gulf of Mexico and Novatek in Russia all combine to strengthen the potential of the Group.

The recent industrial accidents regrettably confirm that the Group must maintain its efforts for vigilance and improvement of safety at the highest levels. In the framework of its policy for investment, training and management, Total will continue to give priority to the safety of its personnel and the protection of the environment.

Confident in its outlook and financial strength, Total will pay an interim dividend to its shareholders in November⁴ of 1.14 € per share, the same amount as the interim and final 2008 dividends. »

⁴ the ex-dividend date for the 2009 interim dividend is November 13 and the payment date is November 18, 2009; for the ADR (NYSE :TOT) the ex-dividend date is November 9.

* detail of adjustment items shown in business segment information.

Adjusted net operating income for the Upstream segment was 1,451 M€ in the second quarter 2009 compared to 3,099 M€ in the second quarter 2008, a decrease of 53%.

Expressed in dollars, adjusted net operating income for the Upstream segment decreased by 59%, reflecting essentially the impact of lower hydrocarbon prices compared to the second quarter 2008 when Brent peaked at an average of 121 \$/b.

Adjusted net operating income expressed in dollars (1,978 M\$) was slightly higher compared to the first quarter 2009, mainly because the higher liquids price offset the lower gas price and lower production volumes.

Compared to the second quarter 2008, the decrease in income from equity affiliates was driven in particular by lower results from Nigeria LNG.

The effective tax rate for the Upstream segment was 58%, unchanged from the first quarter 2009. The effective tax rate for the Upstream segment was 61% in the second quarter 2008.

Adjusted net operating income for the Upstream segment in the first half 2009 was 2,933 M€ compared to 5,830 M€ in the first half 2008, a decrease of 50%. Expressed in dollars, adjusted net operating income for the Upstream segment fell to 3.9 B\$, a decrease of 56%, essentially due to lower hydrocarbon prices.

The return on average capital employed (ROACE²³) for the Upstream segment for the twelve months ended June 30, 2009 was 25% compared to 31% for the twelve months ended March 31, 2009 and 36% for the full year 2008.

²³ calculated based on adjusted net operating income and average capital employed, using replacement cost, as shown on page 20.

In the second quarter 2009, refinery throughput decreased by 5% compared to the second quarter 2008 and by 3% compared to the first quarter 2009.

The second quarter 2009 was affected by the completion of scheduled refinery turnarounds at Donges and Antwerp as well as scheduled turnarounds initiated at Lindsey and Vlissingen. Also, due to the economic conditions, certain refineries elected to reduce throughput during the quarter.

In the second quarter 2008, there was a scheduled turnaround at Leuna and partial turnarounds at Normandy and Grandpuits. In the first quarter 2009, there were scheduled turnarounds at Donges and Lindsey in addition to a voluntary throughput reduction at the Port Arthur refinery in March.

Increased turnarounds and voluntary throughput reductions in the second quarter 2009 reduced the utilization rate based on crude and other feedstocks to 84% from 88% in the second quarter 2008 and 86% in the first quarter 2009.

Adjusted net operating income for the Downstream segment in the first half 2009 was 756 M€, a decrease of 16% compared to the first half 2008.

Expressed in dollars, adjusted net operating income for the Downstream segment was 1 B\$ in the first half 2009, a decrease of 27% compared to the first half 2008, reflecting essentially the less favorable refining environment.

The ROACE²⁴ for the Downstream segment for the twelve months ended June 30, 2009 was 18% compared to 23% for the twelve months ended March 31, 2009 and 20% for the full year 2008.

In the second quarter 2009, petrochemical margins remained under pressure from weak demand in the Atlantic basin and, in the second half of the quarter, suffered from rising naphtha prices. The utilization rate for petrochemical units, however, increased from the low levels of the previous quarter.

In the second quarter 2009, sales for the Chemicals segment were 3.7 B€

Adjusted net operating income for the Chemicals segment was 71 M€, stable compared to the second quarter 2008 and an increase of more than 100 M€ compared to the first quarter 2009.

Compared to the first quarter 2009, the improvement in the Chemicals results were mainly due to relatively good petrochemical export sales to Asia and better resistance by the Specialties that reflected, in particular, their cost reduction efforts and a slight improvement in Asian demand.

In the first half 2009, adjusted net operating income for the Chemicals segment was 39 M€ compared to 228 M€ in the first half 2008, a decrease of 83% that resulted from the economic recession, particularly as it affected Europe and North America.

The ROACE²⁵ for the Chemicals segment for the twelve months ended June 30, 2009 was 7% compared to 7% for the twelve months ended March 31, 2009 and 9% for the full year 2008.

The June 30, 2009 notes to the condensed consolidated accounts are available on the Total web site (www.total.com). This document may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 with respect to the financial condition, results of operations, business, strategy and plans of Total. Such statements are based on a number of assumptions that could ultimately prove inaccurate, and are subject to a number of risk factors, including currency fluctuations, the price of petroleum products, the ability to realize cost reductions and operating efficiencies without unduly disrupting business operations, environmental regulatory considerations and general economic and business conditions. Total does not assume any obligation to update publicly any forward-looking statement, whether as a result of new information, future events or otherwise. Business segment information is presented in accordance with the Group internal reporting system used by the Chief operating decision maker to measure performance and allocate resources internally. Due to their particular nature or significance, certain transactions qualified as "special items" are excluded from the business segment figures. In general, special items relate to transactions that are significant, infrequent or unusual. However, in certain instances, certain transactions such as restructuring costs or assets disposals, which are not considered to be representative of normal course of business, may be qualified as special items although they may have occurred within prior years or are likely to recur within following years.

The adjusted results of the Downstream and Chemical segments are also presented according to the replacement cost method. This method is used to assess the segments' performance and ensure the comparability of the segments' results with those of its competitors, mainly North American.

In the replacement cost method, which approximates the LIFO (Last-In, First-Out) method, the variation of inventory values in the income statement is determined by the average price of the period rather than the historical value. The inventory valuation effect is the difference between the results according to FIFO (First-In, First-Out) and replacement cost.

In this framework, performance measures such as adjusted operating income, adjusted net operating income and adjusted net income are defined as incomes using replacement cost, adjusted for special items and excluding Total's equity share of the adjustments and, from 2009, selected items related to Sanofi-Aventis. They are meant to facilitate the analysis of the financial performance and the comparison of income between periods.

Dollar amounts presented herein represent euro amounts converted at the average euro-dollar exchange rate for the applicable period and are not the result of financial statements prepared in dollars.
