INDEPENDENT AUDITORS' REPORT

To the Shareholder and Directors of TotalEnergies Capital Canada Ltd.

Opinion

We have audited the financial statements of TotalEnergies Capital Canada Ltd. (the "Company"), which comprise:

- the statements of financial position as at December 31, 2021 and December 31, 2020
- the statements of income (loss) and comprehensive income (loss) for the years then ended
- the statements of changes in shareholder's equity for the years then ended
- the statements of cash flows for the years then ended
- and notes to the financial statements, including a summary of significant accounting policies

(Hereinafter referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2021 and December 31, 2020, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards ("IFRS").

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the "Auditors' Responsibilities for the Audit of the Financial Statements" section of our auditors' report.

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.
 - The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of
 expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Communicate with those charged with governance regarding, among other matters, the
 planned scope and timing of the audit and significant audit findings, including any
 significant deficiencies in internal control that we identify during our audit.
- Provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

1. Nature of operations and economic dependence

TotalEnergies Capital Canada Ltd. ("TECCL" or the "Company") was incorporated on April 9, 2007 under the Business Corporations Act (Alberta). TECCL is a wholly-owned subsidiary of TotalEnergies S.E. TECCL issues debt securities and commercial paper. TECCL lends substantially all proceeds of its borrowings to TotalEnergies EP Canada Ltd. ("TEEPC"), which is also ultimately owned by TotalEnergies S.E., and has Canadian oil and gas operations.

The related party loans receivable from TEEPC corresponding to the debt are not expected to be repaid within the next 12 months and as a result they are classified as a non-current asset. The debt is both current and non-current in nature and as a result, TECCL has a working capital deficit of \$7.2 billion at December 31, 2021. The current portion of the debt is expected to be refinanced upon maturity. The ultimate recoverability of the related party loans receivable from TEEPC is dependent upon TEEPC successfully developing its oil sands reserves and realizing positive cash flows from its operations as well as receiving the continued support of TotalEnergies S.E. TotalEnergies S.E. has fully and unconditionally guaranteed the debt securities issued by TECCL as to payment of principal, premium, if any, interest and any other amounts due.

The Company's registered office is located at 4700, 888 – 3rd Avenue S.W., Calgary, Alberta, Canada, T2P 5C5.

2. Basis of presentation

(a) Statement of compliance

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board.

The financial statements were authorized for issue by the Board of Directors on March 18, 2022.

(b) Basis of measurement

The financial statements have been prepared on the historical cost basis except for derivative financial instruments that are measured at fair value with changes in fair value recorded in profit or loss.

The methods used to measure fair values are discussed in note 9.

(c) Functional and presentation currency

The financial statements are presented in U.S. dollars, which is the functional currency of the Company.

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

2. Basis of presentation (continued)

(d) Use of estimates and judgments

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future years affected.

The most significant area of estimation uncertainty and critical judgments in applying accounting policies in the financial statements relate to the fair value of the derivative contracts described in notes 8 and 9.

3. Significant accounting policies

(a) Foreign currency translation

Transactions in foreign currencies are translated to U.S. dollars at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated to U.S. dollars at the period end exchange rate. Foreign currency differences arising on translation are recognized in profit or loss.

(b) Financial instruments

(i) Non-derivative financial instruments

Non-derivative financial instruments comprise cash, interest receivable, related party loans receivable and payable, accounts payable and accrued liabilities and debt. Non-derivative financial instruments are recognized initially at fair value. Subsequent to initial recognition non-derivative financial instruments are measured at amortized cost using the effective interest method, less any loss allowance.

Financial assets are assessed at each reporting date in order to determine whether objective evidence exists that the assets are impaired as a result of one or more events which have had a negative effect on the estimated future cash flows of the asset.

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

3. Significant accounting policies (continued)

(b) Financial instruments (continued)

(i) Non-derivative financial instruments (continued)

If there is objective evidence that a financial asset has become impaired, the amount of the impairment loss is calculated as the difference between its carrying amount and the present value of the estimated future cash flows from the asset discounted as its original effective interest rate. Impairment losses are recorded in earnings. If the amount of the impairment loss decreases in a subsequent period and the decrease can be objectively related to an event occurring after the impairment was recognized, the impairment loss is reversed up to the original carrying value of the asset. Any reversal is recognized in earnings.

(ii) Derivative financial instruments

The Company holds derivative financial instruments to manage its foreign currency and interest rate exposures (see note 8). The Company does not apply hedge accounting but enters into derivative contracts to manage its economic exposure. Derivatives are recognized initially at fair value; attributable transaction costs are recognized in profit or loss as incurred. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are accounted for in profit or loss.

(iii) Share capital

Common shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognized as a deduction from equity, net of any tax effects.

(c) Income tax

Income tax expense comprises current and deferred tax. Income tax expense is recognized in profit or loss except to the extend that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

3. Significant accounting policies (continued)

(d) Finance income and expenses

Finance income comprises interest income on related party loans receivable, management fee from related party, gain on derivatives, other financial income which is comprised of the offset of the losses on derivatives and foreign exchange, and foreign exchange gains. Interest income is recognized as it accrues in profit or loss, using the effective interest method.

Finance expense comprises interest expense on borrowings, finance fees, loss on derivatives, transaction costs, other financial expense which is comprised of the offset of the gains on derivatives and foreign exchange, and foreign exchange losses. Interest expense is recognized as it accrues in profit or loss, using the effective interest method.

Foreign currency gains and losses, reported under finance income and expenses, are reported on a net basis.

4. Related party loans

Non-current related party loans receivable are primarily comprised of U.S. dollar loans obtained by the Company and lent to TEEPC for use in its business. The loans are long-term in nature as the intention is not to repay the loans until TEEPC generates net positive cash flows. TECCL charges TEEPC interest at the market rate applicable to TECCL for the corresponding interest period, which is equivalent to the rate incurred on its outstanding debt as described in note 5. All finance expenses incurred by the Company related to these activities are recovered from TEEPC.

Current and non-current related party loans receivable (payable) are also the corresponding offset to the fair value of the derivatives contracts entered into by the Company that are in a(n) liability (asset) position as at the reporting date.

Current related party loans payable includes interest payable of \$29,795 (2020 - \$29,930) to TotalEnergies Capital, a wholly owned subsidiary of TotalEnergies S.E.

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

5. Debt

The Company is registered to issue commercial paper and medium term notes and is a borrower on revolving credit lines.

(a) Summary of debt outstanding

The following table summarizes the book value of the debt outstanding:

	December 31, 2021	December 31, 2020
Commercial paper Medium term notes	6,084,787 3,831,221	7,256,353 4,067,285
Total	9,916,008	11,323,638

The following table summarizes the book value of the current portion of the debt outstanding:

	December 31, 2021	December 31, 2020
Commercial paper	6,084,787	7,256,353
Medium term notes	1,132,600	-
Total	7,217,387	7,256,353

(b) Commercial paper

The Company is an issuer under TotalEnergies S.E.'s \$17 billion U.S. commercial paper program. The commercial papers are issued at a discount and the Company receives the proceeds net of interest costs. The debt is accreted to its face value using the effective interest rate method with the interest expense recognized over the term of the commercial paper. The repayment terms are determined at the time of issuance; however they cannot be longer than 364 days. TotalEnergies S.E. has fully and unconditionally guaranteed the commercial paper issued as to payment of principal, premium, if any, interest and any other amounts due.

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

5. Debt (continued)

(c) Medium term notes

TECCL issues notes under TotalEnergies S.E.'s €40 billion Euro Medium Term Note Program, the \$14.75 billion U.S. Medium Term Note Program and the \$2 billion Australian Medium Term Note Program. Interest is charged at a fixed or floating rate determined at the time of issuance. The repayment terms of the notes are determined at the time of issuance. TotalEnergies S.E. has fully and unconditionally guaranteed the medium term notes issued as to payment of principal, premium, if any, interest and any other amounts due.

The book value of the medium term notes at December 31, 2021 is as follows:

Currency	value (USD)
USD	1,132,600 999,721 1,698,900
)	USD

The book value of the medium term notes at December 31, 2020 is as follows:

Expiry	Notional value	Currency	Book value (USD)
March 18, 2022 July 15, 2023	1,000,000 1,000,000	EUR USD	1,227,100 999,535
September 18, 2029	1,500,000	EUR	1,840,650
			4,067,285

There were no medium term note issuances or repayments for the year ended December 31, 2021 (December 31, 2020 – no medium term note issuances and two repayments totaling \$1,069,459). The remaining change in book value of the medium term notes from December 31, 2020 to December 31, 2021 is due to the foreign exchange translation of \$236,250 (note 7) (December 31, 2020 – foreign exchange translation of \$408,993) and amortization of debt issue costs of \$186 (December 31, 2020 - \$186).

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

5. Debt (continued)

(d) Revolving credit line

TECCL was a swingline borrower on a US\$150 million multicurrency revolving credit agreement (incorporating a US\$ swingline option) with a chartered American bank. The interest rate on the credit facility was charged using LIBOR determined on the date of issuance. The credit facility was fully and unconditionally guaranteed by TotalEnergies S.E. Since the inception of the facility, no amounts were drawn. Effective December 8, 2021, the facility has terminated after the fifth anniversary of the agreement and will not be renewed.

6. Share capital

The Company is authorized to issue an unlimited number of common shares, and as of December 31, 2021 and December 31, 2020, has 50,000 issued and outstanding common shares at \$1.00 each. All the shares are held by TotalEnergies S.E.

7. Finance income and finance expense

(a) Finance income

	Year ended	Year ended
	December 31, 2021	December 31, 2020
Income on related party loans	111,535	187,957
Management fee from related party	97	2,949
Gain on derivatives	-	330,623
Foreign exchange gain on translation of		
foreign currency denominated debt	236,250	-
Other financial income	282,873	408,993
	630,755	930,522

(b) Finance expense

	Year ended December 31, 2021	Year ended December 31, 2020
Interest on borrowings	111,535	187,957
Finance fees	71	2,856
Other financial expense	236,250	330,623
Loss on derivatives	282,873	-
Foreign exchange loss on translation of foreign cu	rrency	
denominated debt	-	408,993
	630,729	930,429

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

8. Financial risk management and financial instruments overview

The Company has exposure to the following risks from its use of financial instruments:

- credit risk
- liquidity risk
- market risk

The following disclosure presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the management of capital.

(a) Risk management framework

The Board of Directors of the Company has overall responsibility for the establishment and oversight of the Company's risk management framework.

The risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities.

(b) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Company's related party loans and the forward foreign exchange and interest rate swap contracts.

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at December 31, 2021 was \$10,372,976 (December 31, 2020 - \$11,926,217).

Carrying amount	December 31, 2021	December 31, 2020
Cash Interest receivable on related party loans Fair value of derivatives Related party loans receivable	1,156 29,795 14,114 10,327,911	1,091 29,930 228,116 11,667,080
Total	10,372,976	11,926,217

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

8. Financial risk management and financial instruments overview (continued)

(b) Credit risk (continued)

All of the Company's income and the majority of its receivables are from TEEPC. The Company's exposure to credit risk is influenced mainly by the characteristics of TEEPC as a borrower. However, management also considers the default risk of the industry and country in which the borrower operates, as these factors may have an influence on credit risk. The ultimate recoverability of the related party loans receivable from TEEPC is dependent upon TEEPC successfully developing its oil sands reserves and realizing positive cash flows from its operations as well as receiving the continued support of TotalEnergies S.E.

(c) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset.

The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due. The Company's debts are unconditionally guaranteed by TotalEnergies S.E.

The global outbreak of COVID-19 has resulted in increased uncertainty and continues to have a significant impact on the global economy. This economic uncertainty may lead to adverse changes in cash flows, working capital and debt balance, which may also have a direct impact on the Company's operating results and financial position. These and other factors may adversely affect the Company's liquidity and the Company's ability to generate cash flows in the future.

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

8. Financial risk management and financial instruments overview (continued)

(c) Liquidity risk (continued)

The following are the remaining contractual maturities of financial liabilities at December 31, 2021. The amounts are gross and undiscounted and include estimated interest payments.

	Carrying amount	Contractual cash flows	Less than one year	Greater than one year
Derivative and Non-derivative fir	nancial liabilities	s:		
Debt (notional value excluding interest) Interest differential on swaps Related party loans payable Accounts payable and accrued liabilities	9,916,008 - 43,909 1,094	10,321,977 208,452 43,909 1,094	7,380,327 15,393 29,795 1,094	2,941,650 193,058 14,114
-	9,961,011	10,575,432	7,426,609	3,148,822

Also included in debt in the table above are the contractual undiscounted cash flows relating to derivative financial liabilities held for risk management purposes which are not usually closed out prior to contractual maturity.

The interest payments on variable rate commercial papers and medium term notes in the above table reflect current market interest rates at the reporting date and these amounts may change as market interest rates change. The future cash flows on derivative instruments may be different from the amount in the above table as interest rates and exchange rates change. Except for those financial liabilities, it is not expected that the cash flows included in the maturity analysis could occur significantly earlier, or at significantly different amounts.

(d) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

The Company buys and sells derivatives, and also incurs financial liabilities, in order to manage market risks. All such transactions are carried out within the guidelines set by the Board of Directors of the Company. The Company does not apply hedge accounting but enters into derivative contracts to manage its economic exposure.

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

8. Financial risk management and financial instruments overview (continued)

(d) Market risk (continued)

(i) Currency risk

Currency risk is the risk that the future cash flows will fluctuate as a result of changes in exchange rates. The Company manages its exposure to foreign exchange fluctuations on its non-U.S. dollar denominated medium term notes by entering into cross-currency interest rate swaps with TotalEnergies Capital (see interest rate risk section below for the notional value details). Gains or losses on the cross-currency and interest rate swaps are reimbursed by TEEPC, so that the Company's exposure to foreign currency exchange risk is insignificant.

(ii) Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The interest charged on the medium term notes fluctuates with the interest rates posted by the lenders. Any change in interest rates resulting in changes to interest expense are reimbursed by TEEPC. The Company uses long-term interest rate swaps, along with the aforementioned currency swaps, to manage the associated risk.

At December 31, 2021, the Company had the following cross currency and interest rate swap contracts related to the outstanding medium term notes:

Expiry	Notional value	Currency	Notional value (USD)	Swap rate	Fair value (USD)
/					(00-)
March 18, 2022	500,000	EUR	647,450	LIBOR+64.230bp	(75,221)
March 18, 2022	500,000	EUR	647,000	LIBOR+64.520bp	(74,775)
July 15, 2023	250,000	USD	250,000	LIBOR+81.250bp	14,114
July 15, 2023	250,000	USD	250,000	3.4070%	(10,325)
September 18, 2029	500,000	EUR	647,200	3.3645%	(86,399)
September 18, 2029	500,000	EUR	647,400	3.1925%	(78,171)
September 18, 2029	500,000	EUR	647,050	3.3555%	(85,787)
					(396.564)

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

8. Financial risk management and financial instruments overview (continued)

- (d) Market risk (continued)
 - (ii) Interest rate risk (continued)

At December 31, 2020, the Company had the following cross currency and interest rate swap contracts related to the outstanding medium term notes:

	Notional		Notional		Fair value
Expiry	value	Currency	value (USD)	Swap rate	(USD)
March 18, 2022	500,000	EUR	647,450	LIBOR+64.230bp	(20,452)
March 18, 2022	500,000	EUR	647,000	LIBOR+64.520bp	(20,023)
July 15, 2023	250,000	USD	250,000	LIBOR+81.250bp	26,756
July 15, 2023	250,000	USD	250,000	3.4070%	(18,292)
September 18, 2029	500,000	EUR	647,200	3.3645%	(30,634)
September 18, 2029	500,000	EUR	647,400	3.1925%	(21,103)
September 18, 2029	500,000	EUR	647,050	3.3555%	(29,943)
					(113.691)

9. Determination of fair values

A number of the Company's accounting policies and disclosures require the determination of fair value. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

(a) Cash, interest receivable, accounts payable and accrued liabilities and debt

The fair value of cash, interest receivable, accounts payable and accrued liabilities and commercial paper is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date. At December 31, 2021, the fair value of these balances approximated their carrying value due to their short term to maturity.

The fair value of the medium term notes has been determined on an individual basis by discounting future cash flows with the zero coupon interest rate curves existing at December 31, 2021 (level 2 fair value).

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

9. Determination of fair values (continued)

(a) Cash, interest receivable, accounts payable and accrued liabilities and debt (continued)

The fair value of the medium term notes at December 31, 2021 is as follows:

Expiry	Notional value	Currency	Fair value (USD)
March 18, 2022 July 15, 2023 September 18, 2029	1,000,000 1,000,000 1,500,000	EUR USD EUR	1,146,446 1,014,255 1,698,901
			3,859,602

(b) Cross currency and interest rate swap contracts

The fair value of cross currency and interest rate swap contracts are determined by discounting the difference between the contracted prices and published forward price curves as at the reporting date. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations that incorporate various inputs, including foreign exchange spot and forward rates.

The following table summarizes the fair value of the derivatives:

	December 31,	December 31,
	2021	2020
Non-current asset	14,114	228,116
Current liability	(149,996)	-
Non-current liability	(260,682)	(341,807)
	(000 504)	(110.001)
	(396,564)	(113,691)

Fair Value Measurements

Level 1 fair value measurements are based on unadjusted quoted market prices.

Level 2 fair value measurements are based on valuation models and techniques where the significant inputs are derived from quoted indices. The fair value of the foreign exchange and interest rate swaps were determined using level 2 fair value measurements.

Level 3 fair value measurements are based on unobservable information.

Notes to the Financial Statements Years ended December 31, 2021 and 2020 (Thousands of U.S. dollars)

10. Capital management

The Company's objective is to obtain debt financing from the capital markets and to provide the financing obtained to TEEPC by way of related party loans receivable. The Company considers its capital structure to include working capital, debt and shareholder's equity. The Company's shareholder's equity is not subject to external restrictions and the Company has not paid or declared any dividends since incorporation. There are no financial covenants in the Company's debt agreements.

11. Supplemental cash flow information

	Year ended	Year ended
	December 31, 2020	December 31, 2020
Interest receivable on related party loans	135	8,256
Accounts payable and accrued liabilities	(371)	197
Interest payable on related party loans Change in related party loans related	(135)	(8,256)
to fair value of derivatives:	(4.40.000)	4.44.070
Current asset	(149,996)	141,870
Non-current asset	81,125	(32,296)
Non-current liability	(214,002)	221,041
Net change in non-cash working capital	(283,244)	330,812

12. Other commitments and contingencies

The Company, in the normal course of operations, may be subject to various audits by various taxation authorities, including the Canada Revenue Agency ("CRA"). The Company believes that it has appropriately recognized tax assets and liabilities based on the Company's interpretation of relevant tax legislation. Should the CRA initiate a challenge in respect of certain tax filing positions taken by the Company, the Company will update its disclosure and financial statements accordingly.
