This first supplement (the “**First Supplement**”) is supplemental to, and should be read in conjunction with, the debt issuance programme prospectus dated 5 September 2025 (the “**Debt Issuance Programme Prospectus**”), which has been prepared by TotalEnergies SE, TotalEnergies Capital and TotalEnergies Capital International (each an “**Issuer**”, and together the “**Issuers**”, as the case may be) in relation to the €40,000,000,000 Euro Medium Term Note Programme (the “**Programme**”). The Debt Issuance Programme Prospectus, as supplemented by this First Supplement, constitutes a base prospectus for the purposes of Article 8 of Regulation (EU) 2017/2019 as may be amended from time to time (the “**Prospectus Regulation**”). ## RISK FACTORS

1. The risk factor entitled “*The Senior Notes will be unsecured, and therefore an investor’s right to receive payments may be adversely affected*” in the sub-section entitled “*Risks relating to all Senior Notes issued under the Programme and to the structure of a particular issue of Senior Notes*” in the section “*Risk Factors relating to the Notes*” in the chapter “*Risk Factors*” of the Debt Issuance Programme Prospectus on page 25 is hereby deleted and replaced in its entirety with the following:

*“The Senior Notes will be unsecured, and therefore an investor’s right to receive payments may be adversely affected*

The Senior Notes will be unsecured. The Senior Notes are not subordinated to any of the relevant Issuer’s or Guarantor’s (as relevant) other debt obligations, and therefore they will rank equally with all such person’s other unsecured and unsubordinated indebtedness (save for certain mandatory exceptions provided by French law). There is no limitation on the relevant Issuer’s or the Guarantor’s ability to issue secured debt. As of 30 September 2025, \$8,943 million of TotalEnergies SE’s non-current financial debt was secured and as of the same date, each of TotalEnergies Capital and TotalEnergies Capital International had no secured indebtedness outstanding. If the relevant Issuer of the Senior Notes defaults on the Senior Notes or if the Guarantor defaults on the Guarantee, or after the bankruptcy, liquidation or reorganization of the relevant Issuer or the Guarantor, then, to the extent the relevant obligor has granted security over its assets, the assets that secure that entity’s debts will be used to satisfy the obligations under that secured debt before the obligor can make payment on the Senior Notes or the Guarantee, as applicable. There may only be limited assets available to make payments on the Senior Notes or the Guarantee in the event of an acceleration of the Senior Notes. If there is not enough collateral to satisfy the obligations of the secured debt, then the remaining amounts on the secured debt would share equally with all unsubordinated unsecured indebtedness (save for certain mandatory exceptions provided by French law). Therefore, the recovery of an investment in the Senior Notes following a default or after the bankruptcy, liquidation or reorganization of the relevant Issuer or the Guarantor will necessarily be less than that of a debt obligation secured over collateral which could have material consequences for the value of a Noteholder’s investment.”

2. The risk factor entitled “*The Deeply Subordinated Notes and the related Coupons are deeply subordinated obligations of the Issuer*” in the sub-section entitled “*Risks relating to all Deeply Subordinated Notes issued under the Programme and to the structure of a particular issue of Deeply Subordinated Notes*” in the section “*Risk Factors relating to the Notes*” in the chapter “*Risk Factors*” of the Debt Issuance Programme Prospectus on page 31 is hereby deleted and replaced in its entirety with the following:

*“The Deeply Subordinated Notes and the related Coupons are deeply subordinated obligations of the Issuer*

In accordance with Condition 2.1 (*Deeply Subordinated Notes*) of the Terms and Conditions of the Deeply Subordinated Notes, the Issuer’s obligations under the Deeply Subordinated Notes and the related Coupons are direct, unconditional, unsecured and deeply subordinated obligations (*titres subordonnés de dernier rang*) of the Issuer and rank and will rank *pari passu* among themselves. Substantially all of the Issuer’s secured and unsecured debt will rank senior to the Deeply Subordinated Notes issued under the Programme. As of 30 September 2025, TotalEnergies had \$8,943 million of secured non-current financial debt and \$40,609 million of unsecured non-current financial debt.

In accordance with Condition 2.2 (*Payment on the Notes in the event of the liquidation of the Issuer*), in the event of any judgment rendered by any competent court declaring the judicial liquidation (*liquidation judiciaire*) of the Issuer, or in the event of a transfer of the whole of the business of the Issuer (*cession totale de l’entreprise*) subsequent to the opening of a judicial recovery procedure (*redressement judiciaire*), or in the event of the voluntary dissolution of the Issuer or if the Issuer is liquidated for any other reason (in all cases listed above, other than pursuant to a consolidation, amalgamation, merger or other reorganisation outside the context of an insolvency and where the resulting entity assumes the obligations of the Issuer under the Deeply Subordinated Notes and the related Coupons), the rights of Noteholders and Couponholders to payment under the Deeply Subordinated Notes and the related Coupons, as the case may be will be subordinated to the full payment of the unsubordinated creditors of the Issuer (including holders of Unsubordinated Obligations), of the ordinary subordinated creditors of the Issuer (including holders of Ordinary Subordinated Obligations), of lenders in relation to *prêts participatifs*, if any, granted to the Issuer and *titres participatifs*, if any, issued or to be issued by the Issuer, if and to the extent that there is still cash available for those payments. Thus, the Noteholders and Couponholders face a higher recovery risk than holders of unsubordinated and ordinary subordinated obligations of the Issuer. In the event of incomplete payment of unsubordinated creditors and subordinated creditors ranking ahead of the claims of the Noteholders and Couponholders, the obligations of the Issuer in connection with the Deeply Subordinated Notes and the related Coupons shall terminate. The claims of the Noteholders and Couponholders under the Deeply Subordinated Notes

and the related Coupons, as the case may be, are intended to be senior only to claims of shareholders. As of the date of this Debt Issuance Programme Prospectus, there are currently no other instruments of the Issuer that rank junior to the Deeply Subordinated Notes or the related Coupons other than the ordinary shares of the Issuer. The ranking of the Deeply Subordinated Notes may have a significant adverse effect on return and recovery by Noteholders of Deeply Subordinated Notes as compared to Noteholders of Senior Notes which could result in (i) a loss of all or a part of a Noteholder's investment in the event of a bankruptcy and (ii) more volatility in the market price of the Deeply Subordinated Notes as compared to Senior Notes issued under the Programme.”

## DESCRIPTION OF TOTALENERGIES

The chapter entitled “*Description of TotalEnergies*” of the Debt Issuance Programme Prospectus on pages 123 to 124 is hereby deleted and replaced in its entirety with the following:

“For a description of the TotalEnergies, see pages 6 to 9, 10 to 11 and 72 to 131 of the TotalEnergies 2024 URD incorporated by reference into this Debt Issuance Programme Prospectus.

### History and development

TotalEnergies SE is a French European company (*Societas Europaea* or SE) originally incorporated on 28 March 1924 as a *société anonyme* (limited company) which converted into a European company on 16 July 2020. Its corporate existence is through 28 March 2119, unless otherwise extended in accordance with applicable law.

TotalEnergies SE’s history started in 1924 with the creation of the *Compagnie française des Pétroles* (CFP), which began its oil production activities in the Middle East at this time. Over the years, TotalEnergies SE has diversified its activities and opened sites around the world by positioning itself in the gas, refining and petrochemical segments and the distribution of petroleum products, solar power, sustainable biofuels and electricity. In early 1999, the company took over PetroFina S.A. and in early 2000 it took over Elf Aquitaine. Since the repeal in 2002 of the decree of 13 December 1993 that established a golden share of Elf Aquitaine held by the French government, there are no longer any agreements or regulatory provisions governing shareholding relationships between TotalEnergies SE and the French government.

With a presence in 120 countries, TotalEnergies SE is a broad energy company that produces and markets fuels, natural gas and electricity. TotalEnergies’ model of value creation is based on integration across the energy value chain, from exploration and production of oil, gas and electricity to energy distribution to the end customer, and including refining, liquefaction, petrochemicals, trading, and energy transportation and storage. As of 31 December 2024, TotalEnergies’ organization is centred around five business segments: Exploration & Production, Integrated LNG, Integrated Power, Refining & Chemicals and Marketing & Services.

The company’s corporate name is TotalEnergies SE, effective as of 28 May 2021 upon the adoption of a resolution at the annual general meeting of shareholders to change the name from TOTAL SE to TotalEnergies SE.

TotalEnergies SE’s registered office is 2, place Jean Millier, La Défense 6, 92400 Courbevoie, France.

Its telephone number is +33 1 47 44 45 46 and the website address is [www.totalenergies.com](http://www.totalenergies.com).

TotalEnergies SE is registered in France at the Nanterre Trade Register under the registration number 542 051 180.

### Strategy

TotalEnergies’ *raison d’être* is to supply to as many people as possible a more affordable, more available and cleaner energy. As a supporting component of society’s evolutions, energy is a fundamental resource for economic, social and human development, which currently faces a twofold challenge: satisfying the energy needs of an ever-growing world population while reducing global warming. TotalEnergies’ *raison d’être* is rooted in that challenge. TotalEnergies’ intention in becoming a broad energy company is to help meet that challenge in a responsible way.

TotalEnergies’ strategy consists in transforming itself into a broad energy company by profitably growing its energy production, particularly from liquefied natural gas and electricity, the two fastest growing energy markets, to create long-term value for shareholders.

In particular, TotalEnergies’ strategy calls for:

- expanding its presence across the value chain for natural gas, renewable gas and hydrogen;
- pursuing further growth in the renewables market, expanding its power generation and distribution capacity alike;
- focusing on the most resilient oil projects, meaning those with the lowest breakeven point, and prioritizing value over volume while ensuring that its capex allocation is consistent with its climate ambition, as well as adapting refining capacity and sales to changing demand, particularly in Europe, and increasing its biofuels production and sales; and

- investing in two major carbon sink solutions: natural carbon sinks and carbon capture and storage (CCS), as well as R&D programmes to develop negative emissions technologies.
